OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Top 5 Programming Languages that users have worked with and want to work with(in order): JavaScript, SQL, TypeScript, HTML/CSS, Python
- Top 5 Databases that users have worked with (in order): PostgreSQL, MySQL, SQLite, Microsoft SQL Server, MongoDB
- Top 5 Databases that users want to work with(in order): PostgreSQL, Redis, SQLite ,MySQL, MongoDB
- Top 5 Platforms that users have worked with and want to work with (in order): Amazon Web Services(AWS),Microsoft Azure, Google Cloud, CloudFare, Digital Ocean
- Top 5 Webframes that users have worked with (in order): Node.js, React, jQuery, Next.js, ASP.NET CORE
- Top 5 Webframes that users want to work with (in order): React, Node.js, Next.js, ASP.NET CORE, Vue.js

INTRODUCTION

- The Stack Overflow Developer Survey 2024 is an annual global survey capturing trends in the developer community.
- Carried out and completed over May and June 2024
- Over 65,000 developers responded
- Topics included coding, working, AI and how they feel about all of those topics, demographics, education, and technology preferences and more.
- Helps companies, educators, and researchers understand developer needs and industry trends.
- IBM Cognos Analytics was used for Data Visualization in this project.

METHODOLOGY

- 65,437 responses from 185 countries.
- Survey ran: May 19 - June 20, 2024.
- Median time spent on the survey ~ almost 21 minutes.
- Data collected and explored via Web Scraping, API and requests Library.
- Data wrangled to remove inconsistencies.
- Exploratory Data Analysis carried out to find outliers and patterns.
- Data visualization carried out to highlight distribution of data, relationships, composition and comparison of data.
- Dashboards created to show key findings.

PROGRAMMING LANGUAGE TRENDS

Current Year

Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- JavaScript continues to be the most preferred programming language among developers.
- Surprisingly, many preferred HTML/CSS over TypeScript.
- Significant rise in interest to work with Go.
- PHP has fallen out of favor among programmers, dropping out of the top 10.

Implications

- JavaScript and SQL continue to dominate as essential languages, reflecting the growing focus on development and data querying.
- Java has become a very unpopular language.
- Go is rising in popularity which might be due to its simplicity, speed, and built-in support for scalable, concurrent systems.
- The consistent favor of HTML/CSS shows that, despite its simplicity, it remains a core favorite among developers.

DATABASE TRENDS

Current Year

Next Year

Top 10 Databases Have Worked With

Top 10 Databases Want To Work With

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- PostgreSQL is the most widely used database today.
- Redis has overtaken MySQL in demand and usage.
- SQLite maintains steady popularity.
- Oracle's popularity is declining.

Implications

- PostgreSQL remains strong in the market.
- Redis is preferred possibly for its speed and real-time capabilities.
- SQLite continues to serve consistent use cases.
- Despite NoSQL's flexibility, SQL is trusted for reliability, integrity, and power, as reflected in the data..

DASHBOARD

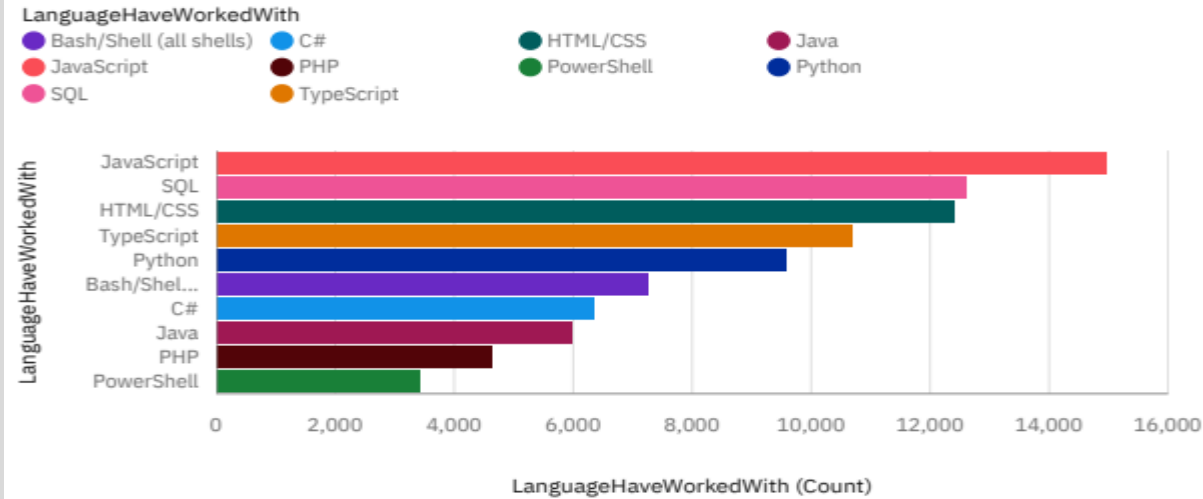

The dashboard link is given below:

https://us3.ca.analytics.ibm.com/bi/?perspective=dashboard&pathRef=.my_folders%2Fsheet1&action=view&mode=dashboard&subView=model00000197e90489b4_000000000

CURRENTLY TECHNOLOGY TRENDS

Top 10 Languages Have Worked With

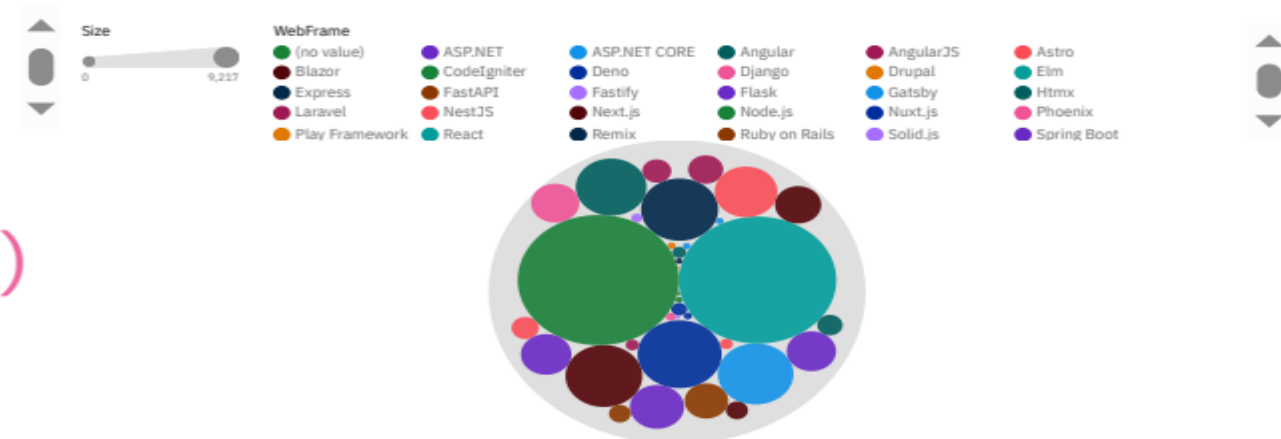

Top 10 Databases Have Worked With

Top 10 Platforms Have Worked With

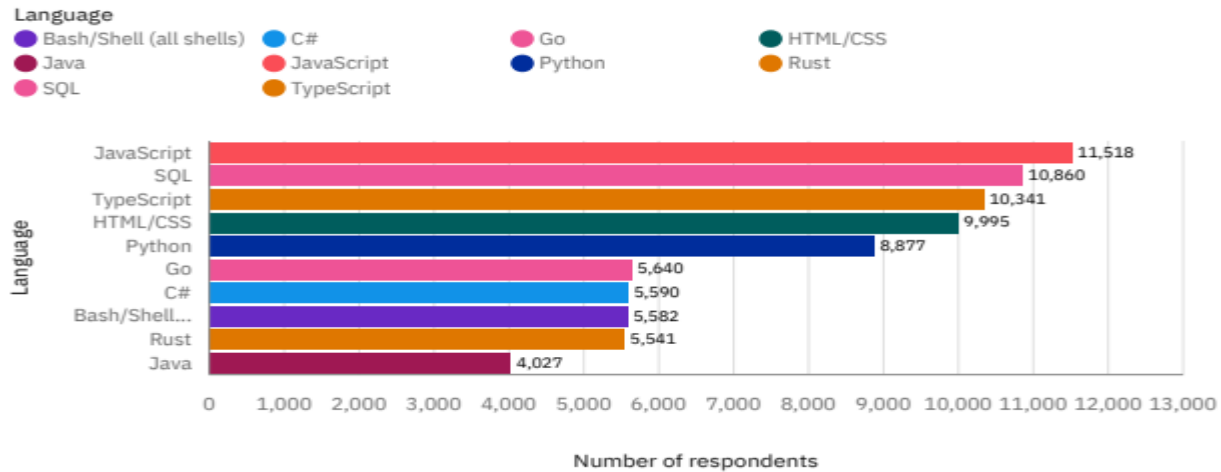

Top 10 WebFrames Have Worked With

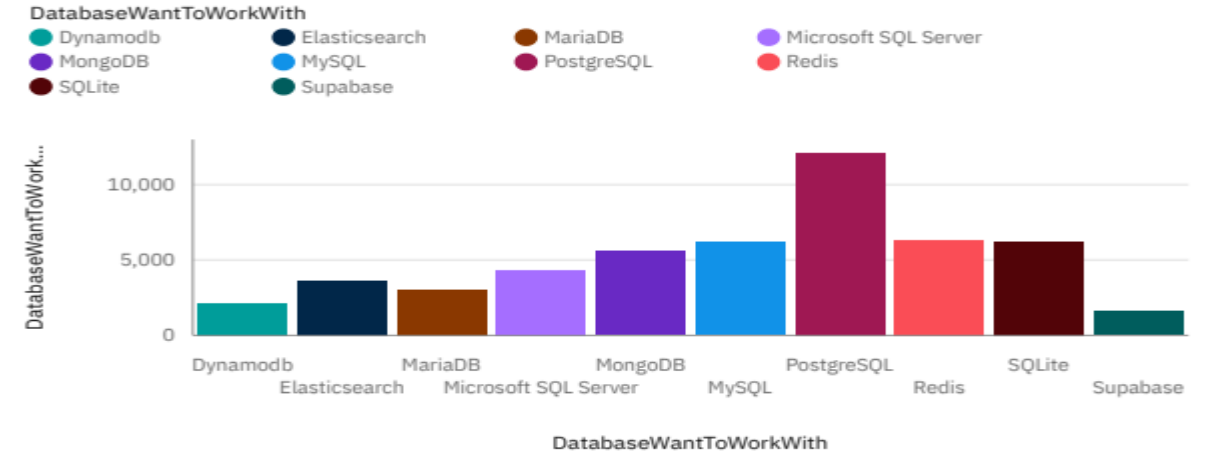

FUTURE TECHNOLOGY TRENDS

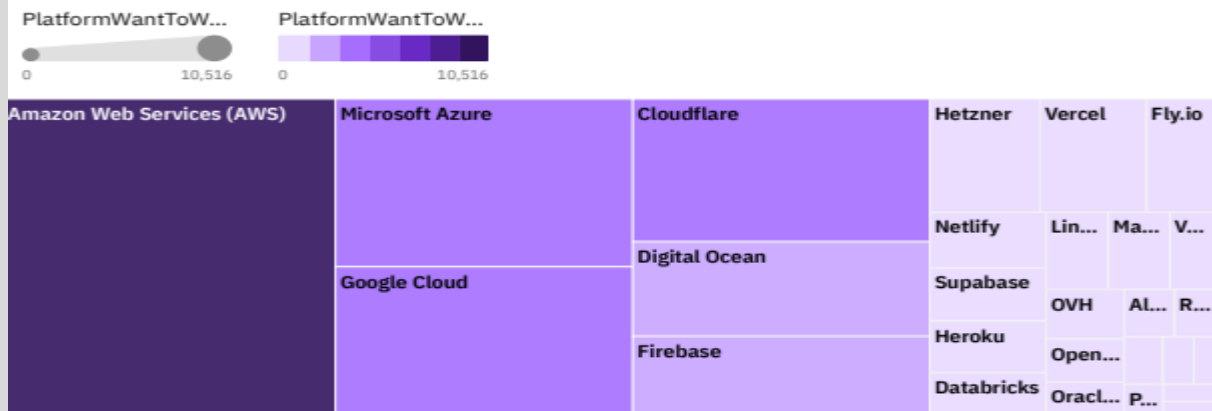

Top 10 Languages Want To Work With

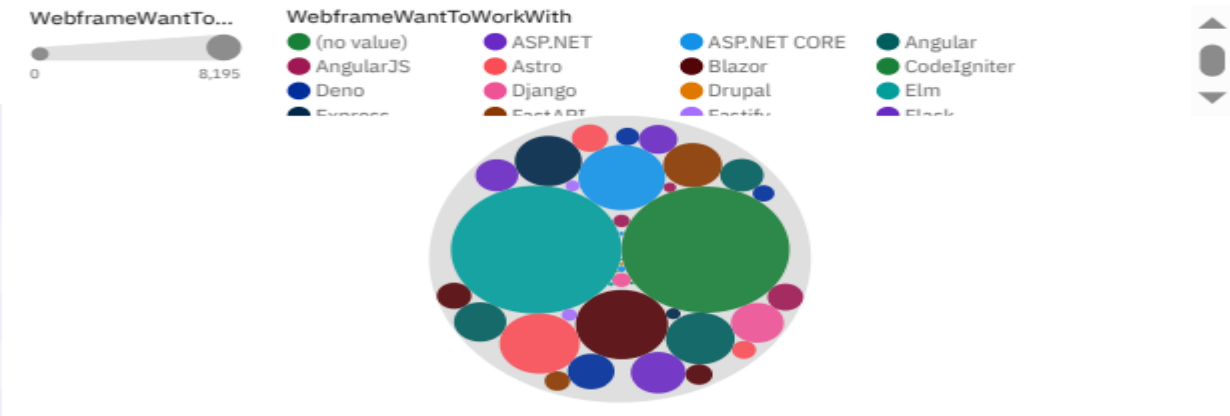

Top 10 Database Want To Work With

Top 10 Platform Want To Work With

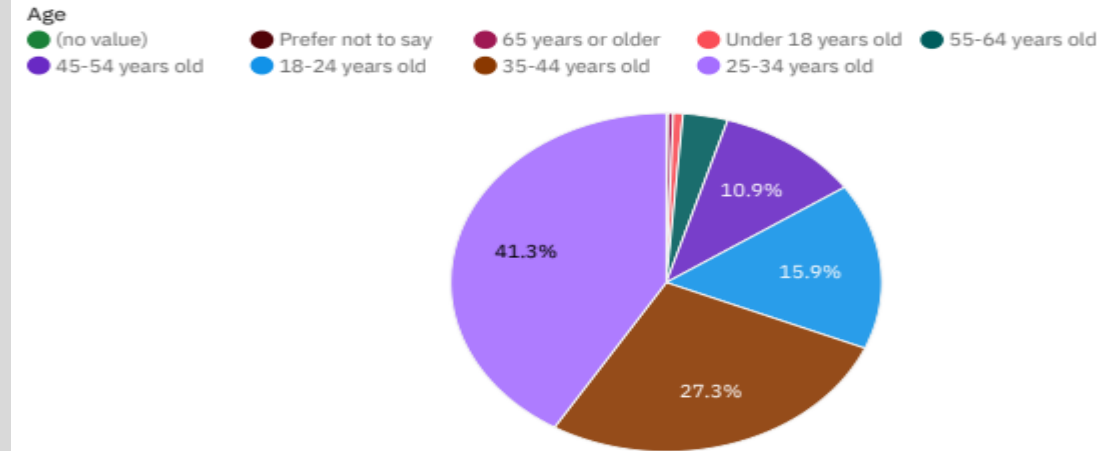

Top 10 Webframe Want To Work With

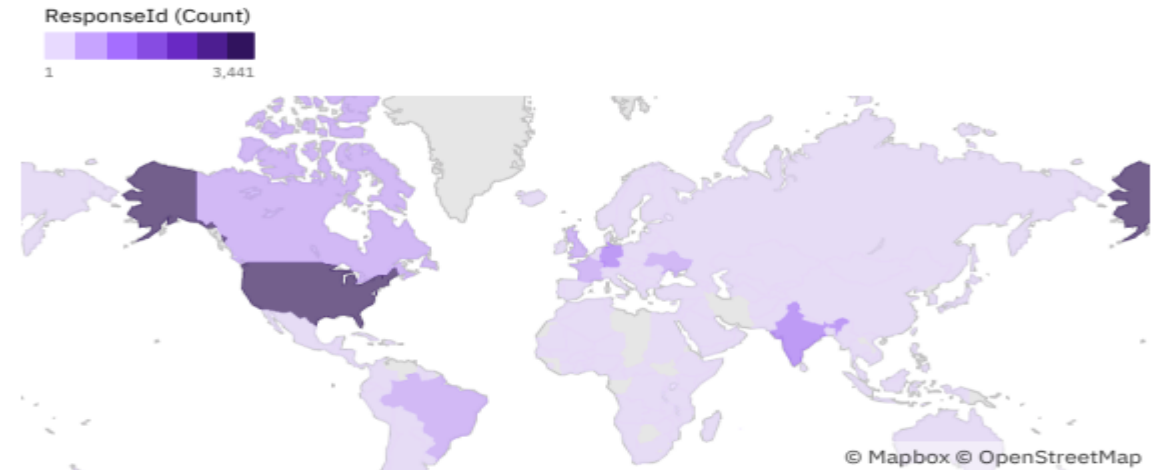

DEMOGRAPHICS

Respondent distribution by Age

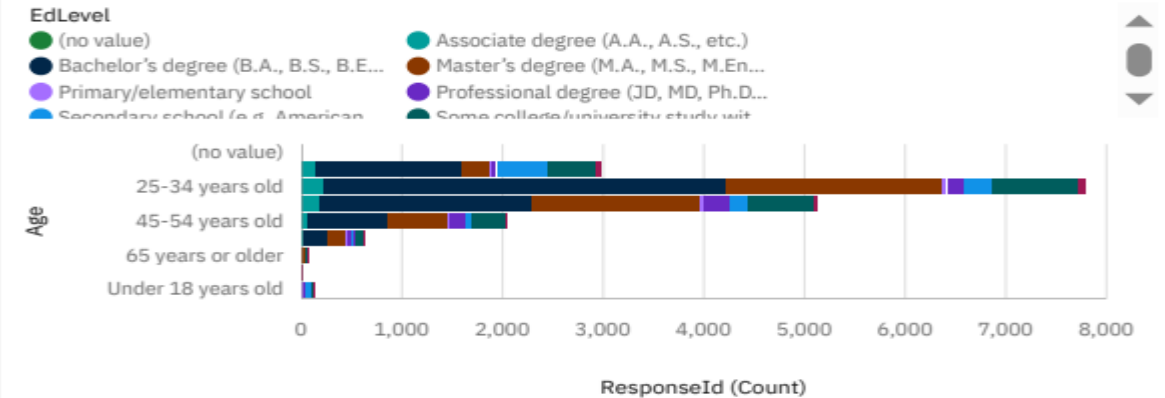

Respondent Count by Country

Respondent distribution by Formal Education Level

Respondent Count by Age, classified by Education Level

DISCUSSION

- JavaScript and SQL dominate as leading languages, with PostgreSQL topping database preferences—underscoring the surge in web development.
- Most developers are aged 20–40 and hold a Bachelor's or Associate degree, reflecting strong educational focus.

OVERALL FINDINGS & IMPLICATIONS

Findings

- JavaScript and SQL lead as dominant languages, with PostgreSQL topping databases.
- Most developers are middle-aged and from developed nations.
- Strong educational background with degrees and certifications.

Implications

- Web development demand remains high, driven by popular languages.
- AWS is the top cloud platform among developers.
- Growing database use signals rising need for data management and analytics.

CONCLUSION

- Web development remains a timeless and in-demand tech skill.
- Developers continuously explore new technologies, databases, and platforms alongside core tools.
- Tech adoption spans all age groups, reflecting growing digital engagement.
